

Forestry and Finance Experts Establish Finite Carbon to Facilitate U.S. Landowners' Participation in Carbon Offset Markets

Published: 24 July 2009

New-formed Finite Carbon provides a single-source, end-to-end solution, including the necessary capital, for landowners to create and monetize carbon offsets.

Nationally, forests sequester almost 200 million tonnes of carbon dioxide a year, offsetting 10 per cent of annual US greenhouse gas emissions, according to the National Alliance of Forest Owners.
