

FiniteCarbon

Finite Carbon provides a single-source end-to-end solution for creating and monetizing forest carbon offsets and offers the most comprehensive forest carbon project development and commercialization service in the United States. Our project team of forest carbon experts offers the experience and resources for successful implementation of forest carbon inventories, protocol selection, project design, verification management, and monetization of forest carbon offsets.

& CARBON
FINANCE

OUR VALUE

Finite Carbon provides the capital to develop and approve forest carbon projects at little to no cost to the landowner. Once a project is successfully registered and approved, Finite Carbon is compensated with a minority percentage of the registered offsets. Post approval, a landowner receives market insight, offset sales support, training, and ongoing project monitoring.

Finite Carbon aligns incentives with each landowner so that we share the same goals: a successful carbon offset project with carbon sold at the highest price without losing sight of an owner's unique needs. Any registration risks associated with the forest carbon offset project are shifted from the landowner to Finite Carbon whose capital and expertise ensure long-term project success.

"Finite Carbon's experienced team are fully conversant with the protocols and process for development of forest carbon assets."

- THOMAS MORROW The Lyme Forest Fund L.P.

Consulting foresters have an unmatched understanding of local issues, challenges, and the unique qualities of privately held forests. Finite Carbon seeks to enhance the relationship between consulting foresters and their clients by supporting the education and decision making process and by providing financial and project management support for forest offsets on qualified forests.

We welcome inquiries and references from consulting foresters in all regions of the US for clients with both domestic and international forestland holdings.

PROCESS & TEAM

1

Educate

We work to give you and your service providers a full understanding of the project development process and ensure carbon is well-aligned with your forest management goals.

Dylan Jenkins, CF

17 years experience in private forestland sustainability, conservation, and certification in the academic, non-profit, and for-profit sectors.

2

Evaluate

We use your existing forest plan and inventory to model potential forest carbon project returns.

Measure

With your forester, we design, and complete a full forest carbon inventory and cover the costs.

Matt Smith, ACF, CF

20 years experience in private forest management and operations; industry expert on forest carbon inventory design and implementation.

Eric Downing, CCF

Duke forestry grad trained in timber growth and yield modeling, forest carbon quantification, and GIS analysis for conservation planning.

3

Model + Document

We model forest growth, harvesting, and carbon offset delivery, then prepare all necessary project documentation and submit this to the registry.

List + Verify

We list your project with the offset registry, and pay for and manage the third-party verification.

Register + Issue

After final offset registry approval, your project is registered and offsets are issued to your account.

Sterling Griffin, RPF

Lead auditor/verifier of first three Climate Action Reserve (CAR) forest carbon projects; California Registered Professional Forester.

Tim McAbee, CF

Extensive experience in project development, forest carbon modeling and forest certification; co-developer of USFS CVal program.

4

Market + Sell

Our incentives are aligned with yours to complete a successful project, obtain the best offset price, and provide ongoing project support.

Sean Carney

Expert in domestic carbon markets; former broker at CantorCO2e and worked with Dell, Volkswagen, and Orbitz to develop their carbon neutral programs while at Carbonfund.org.

“Once again I would like to thank Finite Carbon for its approach to our members on these markets. Finite Carbon brings an integrated finance and forestry approach to forest carbon offsets that is very realistic and that is appreciated.”

- SCOTT JONES
Forest Landowners Association

Downeast Lakes Land Trust

Farm Cove Lake, Maine

First land trust project for the CA Air Resources Board (ARB) program. 20,000 acre IFM project delivered 200,000 offsets at initial issuance.

The Forestland Group

Champion Forest, New York

First TIMO project for the CA ARB program. 103,000 acre IFM project is expected to generate over a half-million offsets during the project's first ten years.

Potlatch Corporation

Moro Big Pine, Arkansas

First REIT project for the CA ARB program. 16,000 acre IFM project generated over 200,000 offsets at initial issuance.

Norfolk Southern

Brosnan Forest, South Carolina

Property harbors SC's largest population of red-cockaded woodpeckers. 12,500 acre ARB IFM project expected to generate nearly a half-million offsets during project's first ten years.

United Church of Christ

Shannondale Tree Farm, Missouri

Oldest certified Tree Farm in Missouri. 4,000 acre ARB IFM project is expected to produce nearly 200,000 offsets in project's first ten years.

Credentials

- + 5 PROFESSIONAL FORESTERS ON STAFF
- + 6 MILLION ACRES OF US FORESTLANDS EVALUATED
- + DEVELOPED AND TRANSACTED THE FIRST IMPROVED FOREST MANAGEMENT (IFM) PROJECTS FOR THE CALIFORNIA AIR RESOURCES BOARD (ARB) GHG EMISSIONS TRADING PROGRAM INCLUDING THE FIRST PROJECTS FOR A LAND TRUST, TIMO, AND REIT.
- + PUBLISHED IN SCIENCE, JOURNAL OF FORESTRY, SAF FORESTRY SOURCE, THE ACF CONSULTANT, FOREST LANDOWNER, TRADING CARBON, AND POINTCARBON

Memberships & Associations

- + SOCIETY OF AMERICAN FORESTERS
- + ASSOCIATION OF CONSULTING FORESTERS
- + LAND TRUST ALLIANCE
- + FOREST LANDOWNERS ASSOCIATION
- + FOREST GUILD

"Milliken Forestry has greatly benefited from the knowledge and expertise that Finite Carbon brings to the table. With a highly qualified team and an extensive background in the forest carbon field, they have assisted us in providing a service to our clients that would otherwise be unapproachable."

- TRIP CHAVIS Milliken Forestry
